

15 MINUTE MAKE...

Hello Sunshine

Brighten someone's day with this cheery greeting

Summer is finally here and we can take time to relax outdoors with a long cool drink! Kitty Day's greeting features a stamped sun worshipper against a watery background that's easy to create. Simply apply inks to acetate, then spritz with water and press onto card. A few flat-backed clear droplets add a great finishing touch!

We used...

- * Card: watercolour; coloured
- * Acetate * Stamps, My Favorite Things, Hey Sunshine * Dies, Lawn Fawn, Stitched Rectangles
- * Distress Ink, Salty Ocean * Pens, Copic * Embellishments, Little Things Clear Raindrops mix
- * Adhesives

1 Rub some distress ink onto acetate and spray with water. Place onto a piece of watercolour card face down. Lift off the acetate and dry with a heat gun. Repeat until the background has been built up with splashes of colour.

2 Die-cut a stitched rectangle panel and attach onto a card blank with foam tape. Stamp and colour the images, then cut them out and attach onto the card.

3 Trim down the sentiment into three pieces and fix in place as shown. Add some clear raindrop embellishments to finish. 

Craft smart

When creating a splash-look background, make sure you heat between each layer
